

## FEEDBACK

Hello, my name is Ge Songlin. I am a Chinese student and I am so honored to get the chance to study in Charles University as a government scholarship holder. I spent my last 10 months in Russian Department, Faculty of Education, Charles University in Prague.

It has been an excellent and precious experience for me. Not only can I receive a different method in the area of Russian Education, but also I am able to get the chance to know one of the most magnificent countries-Czech Republic. Before I came to Prague, I barely know much about the amazing Czech Republic. After spending time in wonderful Prague, I started getting to know the culture, history and traditions of Czech Republic. In addition, I figure out that Czech and China have so much connection, and I am not just talking about the kind, warm-hearted people and delicious food.

As a student, I cannot ask more from our splendid teachers. It's the teachers from the Russian Department that make me love Russian much deeper. The quality of teachers, with no doubt, is the world level remarkable. They have the unique teaching method to target the difference of each students. In other words, they can help every students despite the difference among them. As a Chinese student, I have to admit that we are much more worse than the local Czech students. But the teachers treated us equally, they are even willing to take more time to explain what we don't understand, which really impressed me. Due to the fact Czech language and Chinese Language have an obvious difference, for the courses like Phonetics, the teachers also made special teaching plans for us. Those plans actually suits for us and really help us learn a lot of useful knowledges. And we do learn a lot thanks to the new materials used during the courses, which is very fresh and interesting to get to know.

When it comes to life in Prague, there is no more such a city you can find throughout the world. Prague has its own approachable beauty, and to be honest, live in such a wonderful city is much more like a bonus for every international student. The most important is that Prague is a safe city, you don't have to worry your safety. You can feel the kind and active atmosphere around you. And as a popular city for tourism, I can also get a wonderful break out from the heavy, which really attracts me. It is a little bit of pity that I cannot understand Czech language, so I still feel cannot fill in the Czech life completely. As far as I know, Czech language is different but lovely, I really wish we could get some lessons to learn about it. In addition, I consider letting more people know Czech language as a right and wonderful move. It may also benefits the communication between the local and international students.

Study doesn't just mean stay in the classroom and listen to the lectures. More important, students should go outside the classroom, to experience and learn more. I was hoping we can have more connections with the local students and activities. However, it may not reach my earlier expectation. I do wish we could get more chances to get into the real Czech circle life.

Soon I will go back home, and even though I miss my family, I still miss the days in Charles University. As they said, one is silver, the other is gold. I love Charles University, I love Prague, I love the Czech Republic and I love coming back again!
